

The Pennsylvania Resources Council Presents:

THE “RECYCLING IS MAGIC” SHOW

The “**Recycling is Magic**” Show is an entertaining and informative whole school assembly program for elementary and middle school aged students. Magician Dan Kuniak makes glass bottles disappear, creates a tree out of newspaper, and pulls many other tricks out of his bag! In addition to abracadabra, the kids learn the magic words “reduce, reuse, and recycle.”

THE “LITTER AND MAGIC” SHOW

This entertaining and educational program introduces students to the issues of litter and why it is a problem in their community. Litter related issues addressed are as follows:

- Litter detracts from the aesthetic beauty of the natural environment
- It costs millions of dollars to clean up litter
- Litter discourages economic development and impacts real estate values
- Litter is a safety hazard; can cause fires and is a breeding ground for disease
- Ingesting litter causes injury or death to thousands of pets, wild and farm animals
- Wildlife can become entangled in litter and suffer indirectly through the negative impacts on water quality

Students learn about the amount of litter occurring in Pennsylvania and ways they can help reduce it. Students will also learn the magic words, “Stop, Look, Don’t Litter! Don’t Be a Litterbug!”
